

Sybase iAnywhere Information Anywhere Validated Device List - OneBridge and Afaria

Last Updated: Jan 29, 2008

Validated Devices to date: 254

L1 Validated Devices: 200

L2 Validated Devices: 54

Validated Device Level Support

Sybase iAnywhere offers two levels of device support in order to provide customers the greatest number of validated devices.

Level 1 Device (L1):

A Level 1 device is the exact device certified by Sybase iAnywhere. A Level 1 device is built on the same hardware platform, has the same operating system loaded on it, and runs the same ROM version as the device certified by Sybase iAnywhere.

Level 2 Device (L2):

A Level 2 device is built on the same hardware platform and has the same operating system loaded on it as its Level 1 counterpart on the Information Anywhere Validated Device List. The device is not running the same ROM version as the Level 1 device certified by Sybase iAnywhere. In the event that an issue is identified on an L2 device additional time may be required to resolve the issue.
